
TK MOLD LEADERSHIP BRIEFING

HENDERSON TOOLING ASSOCIATES, INC. | DBA MOLDMINDS.COM

North America Partnership Restructure

AGENCY STRUCTURE AND U.S. MANUFACTURING PATH

Submitted to: Godsend and TK Mold Executive Leadership

Submitted by: Henderson Tooling Associates, Inc. DBA MoldMinds.com

Date: April 19, 2026

01 THE SHIFT IN THE U.S. MOLD MARKET

U.S. OEMs are moving off Asian mold sourcing.

This is not a cyclical reaction to tariffs. It is a durable structural shift that favors toolmakers with U.S. manufacturing capability.

WHAT IS DRIVING IT

- Effective tariff stack on Chinese origin molds now 78 to 88 percent (MFN base, Section 301, Section 232 steel derivatives, IEEPA)
- Reshoring pressure accelerating at the largest OEMs in medical, automotive, packaging, and consumer electronics
- IP protection concerns intensifying on high value programs
- Supply chain resilience now a boardroom priority after 2020 to 2024 disruptions
- Shorter lead time requirements as product lifecycles compress
- Geopolitical risk priced into every major sourcing decision

The pace is accelerating, not reversing.

02 WHAT TK HAS AT STAKE

TK's 12 months of North America investment is real. Without U.S. manufacturing, it erodes.

**WHAT IS ALREADY BUILT**

- › MoldMinds.com brand established and active in the U.S. market
- › tkmold.us domain secured and ready for buildout
- › Relationships in place with reputable U.S. toolshops including Jaeco Precision, A&M Tool and Mold, Western Carolina Tool and Mold, United Tool and Mold, Alchemy Precision, Berman Mold and Engineering
- › Active molder conversations producing pipeline across medical, automotive, packaging
- › Trade show presence, technical content, and LinkedIn visibility building credibility

WHAT IS AT RISK

- › Customers are asking directly for U.S. manufacturing capability
- › Toolmakers who cannot answer that question will lose the business to competitors who can
- › TK's current position is strong but the window is time sensitive
- › Without a formal structure, the investment rides on one individual rather than a legal entity with a team

03 THE JAEKO OPPORTUNITY

Jaeco Precision is the operational U.S. manufacturing platform TK needs.

WHAT JAEKO BRINGS

- Precision machining and injection mold manufacturing, Asheboro, North Carolina
- 2025 EBITDA of \$885,000, verified in LOI negotiations
- 16,500 square foot industrial facility with full equipment set
- CNC machining centers, EDM machines, precision grinding, inspection and quality systems
- Established workforce, customer contracts, vendor relationships
- Intellectual property, trade names, phone numbers, websites all transfer

WHY IT MATTERS FOR TK

- Operational U.S. footprint from day one with no greenfield delay
- No workforce recruitment risk, existing team stays through transition
- Established customer base to absorb introduction of TK capability
- Located in the Southeast, close to major OEM clusters in medical, automotive, packaging
- Six month transition period with both sellers already agreed in LOI
- Brandon has direct relationship with sellers (Jeff Callicutt, Eric Lambeth)

04 JAEKO DEAL ECONOMICS (PER LOI)

Total purchase price: \$6,133,000.

BUSINESS VALUE

\$4,425,000

5.0x 2025 EBITDA of \$885,000

ACCOUNTS RECEIVABLE

\$1,046,000

At face value, verified in diligence

CASH ON HAND

\$662,000

Transferred at closing

REAL ESTATE AND TRANSITION

- > 10 year commercial lease on 16,500 sq ft facility (real estate excluded from purchase)
- > Two 5 year renewal options at buyer discretion, 3 percent annual escalation cap
- > Six month transition period with both sellers
- > 60 day due diligence, 90 day exclusivity

FINANCING STRUCTURE

- > SBA 7(a) loan: 70 to 80 percent of total purchase price
- > Buyer equity: 10 to 20 percent
- > Seller financing: 10 to 20 percent (subordinated to SBA senior debt)
- > Sellers to pay off all outstanding bills and payables at or before closing

05 TWO ACQUISITION PATHS

TK has optionality on how to enter U.S. manufacturing.

PATH A | BRANDON ACQUIRES VIA SBA

- › Brandon acquires Jaeco personally through HTA
- › SBA 7(a) loan pathway, credit review update expected early May 2026
- › TK accesses U.S. manufacturing through the MoldMinds partnership
- › Lower capital commitment from TK
- › Existing seller relationships carry forward cleanly
- › Brandon operates the asset, TK partners commercially and technically

PATH B | TK CONTRACTED ACQUISITION

- › TK contracts Brandon to acquire Jaeco on TK's behalf
- › TK owns the asset directly
- › Brandon operates Jaeco under a management and services agreement
- › Faster close, not gated on SBA timeline
- › Direct TK control of U.S. manufacturing footprint
- › Higher capital commitment from TK with the corresponding return and ownership

Either way, TK gets the footprint. The question for leadership is ownership structure and capital appetite.

06 PARTNERSHIP STRUCTURE

MoldMinds public. Brandon silent. HTA contract restructured.

**PUBLIC PARTNER**

MoldMinds.com, a DBA of Henderson Tooling Associates, Inc., operates as TK Mold's partner in the Americas. MoldMinds is the market facing brand. All client relationships, communications, sourcing coordination, and marketing activity run under the MoldMinds name. TK's intellectual property, customer relationships, and brand identity are protected at all times.

SILENT PARTNER

Brandon Henderson operates as silent partner behind MoldMinds, providing strategic direction, technical oversight, and the acquisition pathway for Jaeco. Brandon's name does not appear on customer facing materials.

FOUNDATION

HTA already holds an active contract with TK Mold. This proposal restructures that existing agreement to reflect the expanded scope: agency operations in North America plus the U.S. manufacturing pathway through Jaeco.

Optional brand presence: tkmold.us is already secured. If TK prefers a direct U.S. brand identity, the website will be built to TK brand standards at HTA's expense, at no cost to TK.

07 COMMERCIAL TERMS

Simple structure. Aligned incentives. Clear boundaries.

COMPONENT	STRUCTURE	NOTES
Monthly Retainer	\$10,000 USD	Step down from current \$12,910. Reflects restructured agency scope.
Annual Sales Target	None	Agency structure, not quota carrying. New business still flows through.
Finders Fees	5% of project value	On new business introduced and converted through MoldMinds. 24 month window from customer introduction.
Prime Contractor Projects	Case by case	Applies when MoldMinds is buyer of record with the end customer (e.g., LatAm payment intermediary structures). Project specific margin agreed in advance.
Technical Deployment Costs	Covered by TK	All travel, lodging, per diem for engineers deployed on TK's behalf.
tkmold.us Website	HTA expense	Built to TK brand standards at no cost to TK, upon agreement.

Role clarity. Brandon has accepted a separate industry position providing personal financial stability. The role is intentionally separate from MoldMinds operations and presents no conflict with the agency structure. Any customer information Brandon encounters in that separate capacity regarding Chinese mold sourcing will continue to flow to Alexandra as professional courtesy, consistent with current practice.

08 PHASED ROADMAP

Three stages. Clear handoffs. Measurable progress.

STAGE 1**Agency Operational**

Timing: Immediately upon agreement

- › MoldMinds manages all North American client relationships
- › Technical dispatches on demand, costs covered by TK
- › Offshore tooling sourcing managed for U.S. customers
- › Pipeline conversion through existing MoldMinds channels
- › HTA contract restructured and in force

STAGE 2**Jaeco Operational**

Timing: Mid to late 2026

- › U.S. mold manufacturing capability online
- › TK engineering expertise integrated with existing Jaeco staff
- › Validation infrastructure built in (IQ, OQ, PQ)
- › Workforce education initiatives with TK technical transfer
- › Temporary visa pathways for TK personnel to train Jaeco team

STAGE 3**Full TK Mold US Integration**

Timing: 2027 and beyond

- › Physical facility functioning as U.S. service and operations hub
- › Mold engineering, design, start up, commissioning
- › Engineering changes, modifications, repairs, on site consulting
- › Permanent TK presence in one of the most important tooling markets in the world

09 NEXT STEPS AND ASK

Decisions and alignment needed from TK leadership.

- 1 Confirm preferred acquisition path: **A** (Brandon acquires via SBA), **B** (TK contracted acquisition), or hold until May 2026 credit update.
- 2 Approve the \$10,000 monthly retainer structure effective on agreement execution.
- 3 Confirm finders fee structure of 5 percent of project value with 24 month window from customer introduction.
- 4 Acknowledge prime contractor project framework for cases where MoldMinds is buyer of record (case by case margin).
- 5 Authorize HTA to begin tkmold.us buildout if TK prefers a direct U.S. brand presence.
- 6 Set timing for execution of the formal restructured partnership agreement.

Proposed Timeline

Week of April 21	Initial TK leadership alignment call
Early May 2026	SBA credit update clarity (affects Path A timing)
May 2026	Formal partnership agreement execution
Q3 2026	Target window for Jaeco acquisition close

TK is positioned. The investment is real. The market is moving. This proposal converts twelve months of groundwork into a durable structure that holds regardless of what the market does next.
